As we do not know the actual resulting percentage any student received in any subject, estimate mean percentages are calculated as follows. Percentages are generated randomly within the bands of possible results. For example, If 6 students received A's, 6 percentages greater than or equal to 85% would be generated, if 20 received B's, 20 percentages greater than or equal to 70% and less than 85% would be generated and so on. A mean (average) of all of these percentages is then calculated. To improve the accuracy of this estimate, this process is repeated 1,000 times for each mean and the average of this value is taken.

Overview of School X versus DEIS population Results

Irish

The percentage of students doing Higher Level Irish was 4% less than the DEIS population percentage (43% versus 47%). At Higher Level, the estimate mean percentage received by students in School X in Irish was 1% below the DEIS population estimate (65% versus 66%). 0% of students received less than 40%, versus 3% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Irish was 16% higher than the DEIS population estimate (76% versus 60%). No students received less than 40%, versus 7% of the DEIS population. 44 students did Irish.

English

The percentage of students doing Higher Level English was 13% greater than the DEIS population percentage (78% versus 65%). At Higher Level, the estimate mean percentage received by students in School X in English was 7% higher than the DEIS population estimate (69% versus 62%). 0% of students received less than 40%, versus 6% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in English was 5% higher than the DEIS population estimate (72% versus 67%). No students received less than 40%, versus 5% of the DEIS population. 51 students did English.

Mathematics

The percentage of students doing Higher Level Mathematics was 4% less than the DEIS population percentage (43% versus 47%). At Higher Level, the estimate mean percentage received by students in School X in Mathematics was 5% below the DEIS population estimate (57% versus 62%). 5% of students received less than 40%, versus 8% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Mathematics was 3% below the DEIS population estimate (61% versus 64%). 15% of students received less than 40%, versus 5% of the DEIS population. 51 students did Mathematics.

History

The percentage of students doing Higher Level History was 4% less than the DEIS population percentage (66% versus 70%). At Higher Level, the estimate mean percentage received by students in School X in History was 6% below the DEIS population estimate (54% versus 60%). 29% of students received less than 40%, versus 15% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in History was 2% below the DEIS population estimate (61% versus 63%). 6% of students received less than 40%, versus 3% of the DEIS population. 47 students did History.

Geography

The percentage of students doing Higher Level Geography was 12% less than the DEIS population percentage (65% versus 77%). At Higher Level, the estimate mean percentage received by students in School X in Geography was 1% higher than the DEIS population estimate (62% versus 61%). 0% of students received less than 40%, versus 3% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Geography was 7% higher than the DEIS population estimate (73% versus 66%). No students received less than 40%, versus 6% of the DEIS population. 17 students did Geography.

French

The percentage of students doing Higher Level French was 13% greater than the DEIS population percentage (74% versus 61%). At Higher Level,

the estimate mean percentage received by students in School X in French was 10% below the DEIS population estimate (52% versus 62%). 10% of students received less than 40%, versus 7% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in French was 6% below the DEIS population estimate (53% versus 59%). 14% of students received less than 40%, versus 9% of the DEIS population. 27 students did French.

German

The percentage of students doing Higher Level German was 30% less than the DEIS population percentage (44% versus 74%). At Higher Level, the estimate mean percentage received by students in School X in German was the same as the estimate received by the DEIS population (63%). 0% of students received less than 40%, versus 6% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in German was 5% higher than the DEIS population estimate (66% versus 61%). 10% of students received less than 40%, versus 8% of the DEIS population. 18 students did German.

Art Craft Design

The percentage of students doing Higher Level Art Craft Design was 23% greater than the DEIS population percentage (100% versus 77%). At Higher Level, the estimate mean percentage received by students in School X in Art Craft Design was 7% below the DEIS population estimate (66% versus 73%). 0% of students received less than 40%, versus 0% of the DEIS population. 30 students did Art Craft Design.

Music

The percentage of students doing Higher Level Music was 14% greater than the DEIS population percentage (86% versus 72%). At Higher Level, the estimate mean percentage received by students in School X in Music was 2% below the DEIS population estimate (64% versus 66%). 0% of students received less than 40%, versus 0% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Music was 16% higher than the DEIS population estimate (73% versus 57%). No students received less than 40%, versus 10% of the DEIS population. 14 students did Music.

Business Studies

The percentage of students doing Higher Level Business Studies was 20% greater than the DEIS population percentage (83% versus 63%). At Higher Level, the estimate mean percentage received by students in School X in Business Studies was 5% higher than the DEIS population estimate (68% versus 63%). 0% of students received less than 40%, versus 6% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Business Studies was 12% higher than the DEIS population estimate (78% versus 66%). No students received less than 40%, versus 5% of the DEIS population. 46 students did Business Studies.

Technical Graphics

The percentage of students doing Higher Level Technical Graphics was 26% less than the DEIS population percentage (43% versus 69%). At Higher Level, the estimate mean percentage received by students in School X in Technical Graphics was 7% below the DEIS population estimate (60% versus 67%). 0% of students received less than 40%, versus 2% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Technical Graphics was 2% higher than the DEIS population estimate (69% versus 67%). No students received less than 40%, versus 8% of the DEIS population. 14 students did Technical Graphics.

Home Economics

The percentage of students doing Higher Level Home Economics was 1% less than the DEIS population percentage (77% versus 78%). At Higher

Level, the estimate mean percentage received by students in School X in Home Economics was 3% below the DEIS population estimate (66% versus 69%). 0% of students received less than 40%, versus 1% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Home Economics was 12% below the DEIS population estimate (54% versus 66%). No students received less than 40%, versus 4% of the DEIS population. 26 students did Home Economics.

Science

The percentage of students doing Higher Level Science was 17% greater than the DEIS population percentage (80% versus 63%). At Higher Level, the estimate mean percentage received by students in School X in Science was 5% higher than the DEIS population estimate (68% versus 63%). 0% of students received less than 40%, versus 6% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Science was 12% higher than the DEIS population estimate (78% versus 66%). No students received less than 40%, versus 5% of the DEIS population. 44 students did Science.

Technology

The percentage of students doing Higher Level Technology was 18% less than the DEIS population percentage (70% versus 88%). At Higher Level, the estimate mean percentage received by students in School X in Technology was 11% higher than the DEIS population estimate (74% versus 63%). 0% of students received less than 40%, versus 8% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Technology was 25% higher than the DEIS population estimate (77% versus 52%). No students received less than 40%, versus 18% of the DEIS population. 20 students did Technology.

Religious Education

The percentage of students doing Higher Level Religious Education was 15% greater than the DEIS population percentage (84% versus 69%). At Higher Level, the estimate mean percentage received by students in School X in Religious Education was 5% higher than the DEIS population estimate (69% versus 64%). 0% of students received less than 40%, versus 7% of the DEIS population. At Ordinary Level, the estimate mean percentage received by students in School X in Religious Education was 4% below the DEIS population estimate (64% versus 68%). No students received less than 40%, versus 3% of the DEIS population. 51 students did Religious Education. This was the first year in the past four years that any student at School X did Religious Education.

CSPE

The estimate mean percentage received by students doing CSPE was 1% higher than the DEIS population estimate (62% versus 63%). 12% of students received less than 40%, versus 4% of the DEIS population. 51 students did CSPE in 2019 .

Note on commentary, national versus DEIS

The commentary in the previous section compares School X's results with the DEIS population results, where there are DEIS population statistics available. As DEIS population statistics are only available for 2019, the year on year commentary before each subject which follows from here is based on the comparison between School X's results and results nationwide.

Irish

44 students did Irish.

Percentage doing Higher Level

The percentage of students doing Higher Level Irish was 15% less than the percentage nationwide (43% versus 58%). This was an improvement on previous years, except for 2016 where the difference between School X and the national percentage doing Higher Level Irish was 1%.

Higher Level results

At Higher Level, the estimate mean percentage received by students in School X in Irish was 1% below the DEIS population estimate (65% versus 66%). Although this was an improvement on the 2018 estimate mean percentage versus the national estimate, it was lower than other previous years, where the difference between School X and the estimate mean percentage received nationally in Higher Level Irish was between -4% and -2%.

0% of students received less than 40%, versus 3% of the DEIS population. This was an improvement on the previous year result (5%).

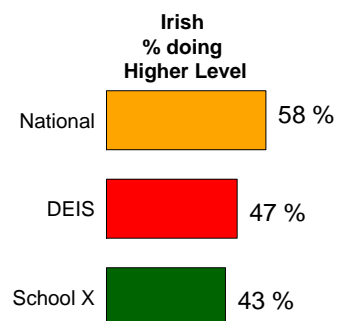

Ordinary Level results

At Ordinary Level, the estimate mean percentage received by students in School X in Irish was 16% higher than the DEIS population estimate (76% versus 60%). This was an improvement on the previous three years, where the difference between School X and the national estimate mean percentage was between -3% and 2%.

No students received less than 40%, versus 2% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Mathematics

51 students did Mathematics.

Percentage doing Higher Level

The percentage of students doing Higher Level Mathematics was 14% less than the percentage nationwide (43% versus 57%). This was an improvement on previous years, except for 2016 where the difference between School X and the national percentage doing Higher Level Mathematics was -3%.

Higher Level results

At Higher Level, the estimate mean percentage received by students in School X in Mathematics was 7% below the DEIS population estimate (55% versus 62%). This was a worse result than previous years, where the difference between School X and the national estimate mean percentage Mathematics was between -7% and -4%.

5% of students received less than 40%, versus 8% of the DEIS population. This was worse than the previous year result (0%).

Ordinary Level results

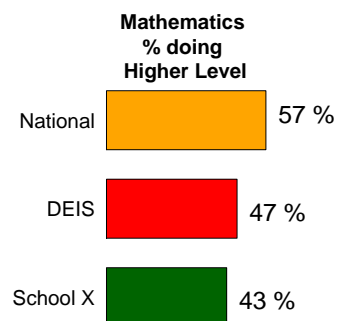

At Ordinary Level, the estimate mean percentage received by students in School X in Mathematics was 3% below the DEIS population estimate (61% versus 64%). This was a worse result than previous years, except for 2017 where the difference between School X and the national estimate mean percentage for Ordinary Level Mathematics was -6%.

15% of students received less than 40%, versus 4% nationwide. As well as being worse than the national percentage in 2018, this percentage was worse than the previous three years in School X.

History

47 students did History.

Percentage doing Higher Level

The percentage of students doing Higher Level History was 7% less than the percentage nationwide (66% versus 73%). This was a lower relative percentage than previous years, except for 2017 where the difference between School X and the national percentage doing Higher Level History was also -7%.

Higher Level results

At Higher Level, the estimate mean percentage received by students in School X in History was 8% below the DEIS population estimate (52% versus 60%). This was a worse result than previous years, where the difference between School X and the national estimate mean percentage History was between -6% and 13%.

29% of students received less than 40%, versus 15% of the DEIS population. As well as being worse than the national percentage in 2018, this percentage was worse than the previous three years in School X.

Ordinary Level results

At Ordinary Level, the estimate mean percentage received by students in School X in History was 4% below the DEIS population estimate (59% versus 63%). This was a worse result than previous years, where the difference between School X and the national estimate mean percentage History was between 2% and 11%.

6% of students received less than 40%, versus 10% nationwide. For the past number of years, the percentage of students receiving less than 40% has been less than the percentage nationwide each year.

Geography

17 students did Geography.

Percentage doing Higher Level

The percentage of students doing Higher Level Geography was 21% less than the percentage nationwide (65% versus 86%). This was a lower relative percentage than previous years, where the difference between School X and the national percentage doing Higher Level Geography was between -8% and 9%.

Higher Level results

At Higher Level, the estimate mean percentage received by students in School X in Geography was the same as the estimate received by the DEIS population (61%). This was an improvement on previous years, where the difference between School X and the national estimate mean percentage was between -8% and -7%.

0% of students received less than 40%, versus 3% of the DEIS population. This was the first time in four years that no student has received less than 40% in Higher Level Geography.

Ordinary Level results

At Ordinary Level, the estimate mean percentage received by students in School X in Geography was 13% higher than the DEIS population estimate (79% versus 66%). As well as being greater than the national estimate mean percentage in 2018, this has been a consistent result for previous years, except for 2017 where the difference between School X and the national estimate mean percentage in Ordinary Level Geography was -7%.

No students received less than 40%, versus 4% nationwide. No student received less than 40% either in 2018. This was an improvement on previous years.
